Thorough and compassionate QA Engineer with 10 years experience ensuring high-quality software from design to release.

WORK HISTORY

CompanyCam • 2023-2025

QA Engineer III

- Created and maintained a robust testing framework using Cypress, reducing regression testing time.
- Worked closely with developers, product managers, and designers in an Agile environment.
- Contributed to product development strategies, design critiques and user interviews using Continuous Delivery Habits.
- Conducted in-depth manual testing of new features, regression suites, and weekly mobile releases.
- Developed and maintained bug tracking and triage processes, communicating cross functionally with customer service and product to prioritize backlog.

Imperfect Foods 2015 • 2023

QA Engineer

- Led automated and manual testing for several business critical features and services.
- Created, maintained and optimized Typescript UI, mobile app and API testing using CodeceptJS, Playwright and Appium.
- Diagnosed & triaged bugs and resolved CI pipeline failures.
- Led testing for the successful launch of the company's first iOS and android react native apps.

QA Associate & Engineering Support

- Designed and executed manual test plans for Javascript UI and third party integrations across browsers and devices.
- Evaluated priority of technical support issues and assisted developer resources for customer facing website, and internal tooling.
- Executed new market launches utilizing Mode Analytics and Postman API calls.
